WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

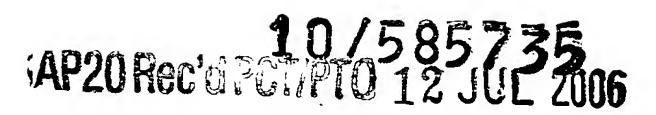

International application No. PCT/GB2004/004950

-		
_	Box	No. I Basis of the opinion
1.		h regard to the language, this opinion has been established on the basis of the international application in language in which it was filed, unless otherwise indicated under this item.
		This opinion has been established on the basis of a translation from the original language into the following language , which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2.		n regard to any nucleotide and/or amino acid sequence disclosed in the international application and essary to the claimed invention, this opinion has been established on the basis of:
	a. ty	pe of material:
		a sequence listing
		able(s) related to the sequence listing
	b. fo	ormat of material:
		in written format
		in computer readable form
	c. tir	ne of filing/furnishing:
		contained in the international application as filed.
		I filed together with the international application in computer readable form.
		furnished subsequently to this Authority for the purposes of search.
3.		In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4.	Addi	tional comments:

_	Во	x No. II	Priority		2 4 4	
1.	\boxtimes	The fol	llowing document h	as not be	en furnishe	d:
		\boxtimes	copy of the earlier	applicatio	n whose p	riority has been claimed (Rule 43bis.1 and 66.7(a)).
			translation of the	earlier app	lication wh	ose priority has been claimed (Rule 43bis.1 and 66.7(b)).
						ider the validity of the priority claim. This opinion has tion that the relevant date is the claimed priority date.
2.		has be		ules 43 <i>bis</i>	.1 and 64.1	rity had been claimed due to the fact that the priority claim 1). Thus for the purposes of this opinion, the international the relevant date.
3.		was no	t available to the IS	SA at the ti	me that the	of the priority claim because a copy of the priority documes search was conducted (Rule 17.1). This opinion has ion that the relevant date is the claimed priority date.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/GB2004/004950

Re Item V.

- 1 The following documents are referred to in this communication:
 - D1: DE 41 08 596 A1 (CIBA-GEIGY AG, BASEL, CH) 26 September 1991 (1991-09-26)
 - D2: WO 01/66647 A (AVECIA LIMITED; PATEL, PRAKASH; WIGHT, PAUL) 13 September 2001 (2001-09-13)
 - D3: US-A-5 665 871 (PEDRAZZI ET AL) 9 September 1997 (1997-09-09)
 - D4: WO 03/078529 A (AVECIA LIMITED; ROBERTSON, COLIN, DICK; JOHNSON, JILL, LOUISE; PATEL,) 25 September 2003 (2003-09-25)

Document D4 is cited in the application.

2 INDEPENDENT CLAIM 1

2.1 Document D3, which is considered to represent the most relevant state of the art, discloses (the references in parentheses applying to this document):
A method of ink jet printing on a substrate using an ink comprising a phthalocyanine dye (claim 1, 23 and 24). The dye is obtained by a process comprising continuous ultra filtration, without loss of dye stuff, using a membrane

From this, the subject-matter of independent claim 1 differs in that:

with a "cut-off level" of 2,000-15,000 (example 1).

A phthalocyanine dye of formula (1) is used and that cross flow filtration is used for the fractionation of the dye.

The subject-matter of claim 1 is therefore novel (Article 33(2) PCT).

The applicant has not shown, e.g. by means of comparative examples, that the molecular structure of the phthalocyanine dye and the flow direction in the filtration process give rise to a technical effect.

The problem to be solved by the present invention may be regarded as:

To provide an alternative phthalocyanine dye produced with an alternative filtration process. A person skilled in the art will find in document D2 (examples 1 and 2) phthalocyanine dyes of the present Formula (1) and in document D1 (page 2, line 10-11 and 33-35; page 4, line 38-59 and page 5, line 17-20) a purification process for phthalocyanine dyes by means of cross flow filtration. However, a skilled person will not combine 3 documents to solve the problem posed.

The solution to the problem proposed in claim 1 of the present application is therefore considered as involving an inventive step (Article 33(3) PCT).

- 2.2 Claims 2-12 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
- 3 INDEPENDENT CLAIM 13
- 3.1 A similar reasoning applies to the subject matter of independent claim 13 and its dependent claims 14 and 15.
- 4 INDEPENDENT CLAIMS 16 AND 17
- 4.1 Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parentheses applying to this document):
 - A process for the purification of a dye such as phthalocyanine with cross flow filtration. The dyes are usable in ink jet inks (page 2, line 10-11 and 33-35; page 4, line 38-59 and page 5, line 17-20).

From this, the subject-matter of independent claim 16 differs in that:

The phthalocyanine dye is of the present formula (1) and the ink is defined by its viscosity and ion concentration and is filtered.

The subject-matter of claim 16 is therefore novel (Article 33(2) PCT).

The applicant has not shown that the distinguishing features give rise to a technical effect.

The problem to be solved by the present invention may be regarded as:

To provide an alternative ink jet ink having a defined viscosity and ion concentration and comprising an alternative phthalocyanine dye.

Document D4 discloses an ink jet ink comprising a phthalocyanine dye of present Formula (1). The ink is filtered through a filter having a mean pore size below 10μm and has a viscosity of less than 20 cP and less than 500ppm, in total of divalent and trivalent metal ions (page 1, line 21-29; page 7, line 22-34 and claims 1, 7-13).

Therefore, the solution to the problem proposed in claim 16 of the present application is not considered as involving an inventive step (Article 33(3) PCT).

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/GB2004/004950

- 5 INDEPENDENT CLAIM 17
- 5.1 A similar reasoning applies to the subject matter of independent claim 17

Re Item VIII.

The application does not meet the requirements of Article 6 PCT, because claims 1 and 16 are not clear.

Claims 1 and 16: The attention of the applicant is drawn to the fact that the term "optionally" has no limiting effect on the scope of the claim, that is to say, the feature following said term is to be regarded as entirely optional (PCT Guidelines 5.40).
